

## Knowledge & Understanding of the World

### History

We will be learning about the Anglo-Saxons. We'll explore their society, settlements, and daily routines, using historical texts and archaeological evidence to understand their way of life. Additionally, we'll investigate the Anglo-Saxon influence on Britain, including their language, laws, and customs, to gain insights into early English history and culture.

### Geography

This term we will be exploring the question: Are all settlements the same? We'll investigate how settlements differ in terms of their location, layout, and purposes, examining factors such as geography, resources, and historical context. Through hands-on activities and inquiry-based learning, we'll develop an understanding of how settlements vary and the factors that shape their development.

### Computing

We will delve into the intricacies of computer networks, focusing on the internet and its diverse services like the World Wide Web. Through interactive activities, they'll grasp the significance of communication and collaboration facilitated by these networks. They'll also learn to navigate search technologies effectively, understanding how results are curated and ranked, while simultaneously honing their ability to evaluate digital content critically.

### Science

Our science topic of animals including humans' children will investigate the structure and function of the human digestive system, understanding how nutrients are processed and absorbed. Additionally, they'll learn about teeth and their role in digestion, as well as the importance of a balanced diet and exercise for maintaining a healthy lifestyle.

## Problem solving and reasoning

### Maths

This term, our attention will be directed towards geometry, money, mass, volume and length, position and movement and graphs. We will explore these mathematical concepts in depth, building upon their existing knowledge and skills. Through engaging activities and structured learning, we will develop a deeper understanding of these mathematical principles.

# Summer 2

## Communication, language and literacy

### Literacy

This term in Literacy, we are exploring the book *Blue John* by Berlie Doherty. Inspired by the story's magical cave setting, children will write a letter in role as an expert, explaining how caves are formed. This engaging topic combines storytelling with factual writing and supports our non-fiction writing skills.

## Personal, social and emotional development

### PSHE

We will focus on the topic of relationships. They will learn about the importance of empathy, communication, and cooperation in building healthy relationships with family, friends, and peers.

### RE

In RE this term, we are exploring the question: *What does "Love your neighbour" really mean?* Through stories, discussions, and reflection, children will consider how this important message is lived out in different religions and everyday life. They'll learn about kindness, respect, and how our actions affect others.

## Creative development

### Music

This term, we'll delve into the timeless melody of "Blackbird" by The Beatles, exploring its lyrical depth and musical resonance.

### PE

Students will be introduced to the fundamentals of cricket. They will learn basic techniques such as batting, bowling, and fielding, developing coordination, teamwork, and sportsmanship through fun and engaging activities.

### Art

This term will be creating a printed fabric design using nature, drawing inspiration from the renowned artist William Morris.
